Postcard Campaigns for Policy-Makers

Policy-Makers make the decisions that affect our lives. One way to reach out to the ones who make decisions about YOUR issues is to organize a Postcard Campaign. Together with other like-minded people, you can amplify your voices and elevate your advocacy!

Here are some tips for organizing an effective campaign:

1. Recruit a group of friends, family and community members who share concern about your issue.

Or if you want work through a **school group**, find a supportive adult sponsor. Get permission to use the name of the school group on your postcards.

- 2. Research your issue using reliable resources.
- 3. **Identify the policy-maker(s)** who will receive your postcards. Find your legislator(s) here or see the LWVPGH's Your Government Officials for links and contact information of local, state, and federal officials.
- **4. Decide on the message** with your team. Make sure to **include your "ask"** and request a response. **Return addresses** must be included, whether it is your own or a return address identified by your sponsor at school.
- **5. Get creative and design your postcard.** If you can raise funds for this project, consider using a graphics website. Another option is to use blank postcards and design a template that all of the team will copy.
- **6. Schedule your postcard writing session(s)** and make it fun! Find supportive organizations that will cover the postage costs and ask volunteers to attach a stamp to each postcard.
- **7. Mail your postcards.** You will probably have to visit local post offices. Postal workers will be helpful if you have questions.
- **8. Collect data:** number of volunteers on the team, total number of postcards sent, number of legislators contacted, number of responses received.

Congratulations! You have advanced your advocacy with this Action Civics project!
